FACE PAINTING GUIDE

GETTING YOUR PANDA EYES

1 Use a damp sponge to apply white paint around the middle of your model's face. Start from above the eyebrows and down to the top of the lip, avoiding the eye area. Use a brush and the white paint to create a fur effect around the outside of the face.

2 Use a damp sponge to carefully dab black paint around each eye area to create black circles. With a brush, paint black ears on either side of the face. Use a brush and the black paint to create a fur effect around the eyes and ears.

3 Use a brush to outline the panda's face with black paint. Outline the panda's nose with zigzag lines that are to the sides of the model's nose. Paint black above your model's nostrils and bring these marks together as a V on the tip of the model's nose. Then paint a line down that finishes just above the lip.

4 Paint a curved line from the corner of the lips that leads close to the panda's nose. Inside the curved line add dots with the tip of a brush.

Panda face painting examples:

FLOAT LIKE A BUTTERFLY

- 1 Above and under both eyes, use a damp sponge to create two wing shapes in your chosen colour (a lighter colour than the one you'll use for detailing is best). Use a brush to paint two small flower shapes above one eye, in the gap on the forehead.
- 2 Use a darker colour and a brush to add detail around the wings. Use the same colour to paint the body of the butterfly on the length of your model's nose. Also add two feelers on your model's forehead that are attached to the top of the body.
- 3 With the tip of a brush and white paint, outline the edge of the butterfly to highlight it. Also use the white paint to add detail to the two flowers, and to add dots, or a design of your choice, to the edge of the butterfly. Finish with a little dusting of eco-glitter, but please make sure it doesn't go too close your model's eyes.

Butterfly face painting examples:

EASY TIGER

1 Use a damp sponge to cover the bottom of your model's face – from below the nose to the jaw line – with a yellow base. Then sponge the top of their face with orange paint.

2 Apply white detailing with a brush. This includes a wide moustache underneath the nose and across the top of the lip. Also add two upside down triangles at either side of the bottom lip to create fangs. Then draw white spiky eyebrows above each eye and three white strokes at the corner of each eye.

3 Add extra white strokes along the side of the cheek, just above the jaw line. Leave enough space between each line to add in more colour at the final stage.

4 Colour the tip of the nose in black and add black strokes to the white eyebrows and at the corner of the eyes. Do the same between the white lines on the jaw line, and then at the edge of the mouth and fangs. Finally, paint a line from the middle of the nose to the middle of the top lip and add black dots on the white moustache. Finish with three whiskers on each side.
